

Do You Have An Updated **RESUME?**

Why You Need a Resume

Whether you're currently employed, facing uncertainty in your position, getting ready to graduate, or looking for a job, it's always important to have an up-to-date resume. You never know when an amazing job opportunity - or pink slip - may fall into your hands.

- A great resume can get you in the door to interview for your dream job, but it can also make or break your job search.
- A professional, well-written resume can cause employers to seek you out.
- A sloppy, mistake-laden resume can quickly turn off a hiring manager.

Let us create and / or update your resume today, while you have free time to work on it. Don't wait until someone asks you for it. Working frantically to complete your resume under pressure to meet a deadline in an unexpected situation will probably not get you the results you need.

What We Do

We start with your current resume, and discuss your career objectives to develop the appropriate resume type for your needs. We then help you organize your thoughts, assess your experience, skills and education, and focus on the style, appearance, content, and overall effectiveness of your resume. Next, we develop a draft, verify the content, ensure it is error-free, and review it with you. With your feedback, we then make edits, perform a final proofread and complete a final product that you will be proud of.

About Us

We have more than 25 years of experience recruiting, interviewing and hiring employees at Anheuser-Busch. We guarantee that we will exceed your expectations and give you a final product that will professionally and effectively work for you.

We can also help with cover letters and interview preparation.
